

ALL Global Tables List - Changes to fields / columns in one company change it in all companies.

Details

ALL Global Tables List - Changes to one of these in one company changes it in all companies.

Think of it this way: Same Data All Companies.

Steps

Issue:

There are certain files that once set up in one company can be accessed in another. We need to be aware that they exist when working in multiple companies systems.

- Payroll | Maintenance | Income Tax Table Maintenance | Tax Table

The table that contains the graduated tax rates for single, married, head of household and other is global. That means that clients only need to update a specific tax code once and will in essence update the rates for all companies at the same time. Note that all other information found in Payroll Income Tax Table Maintenance is stored in a company specific table.

- Payroll | Maintenance | Income Tax Table Maintenance | Resident Exemption Maintenance

- Payroll | Maintenance | Electronic File Table Maintenance

- General Ledger | Maintenance | Financial Statement Formats

- Material Management (formally Scale Interface) | Maintenance | Data File Format

- Cash Management | Maintenance | Clearing Data File Format

- Cash Management | Maintenance | Positive Pay File Format

- Admin | Price Update | Commodity Code File Maintenance

- Admin | Security |
